

HOW TO PROPOSE AN ABSTRACT

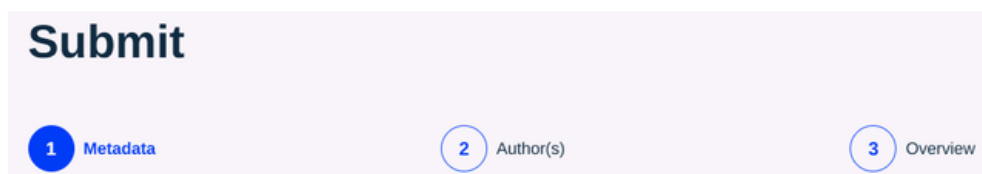

To submit your abstract and/or poster you will need :

- To have an account on the Sciencesconf platform
- Connect by clicking on the button (see [Connect](#))

You will need to complete 3 steps:

1. Define your abstract's characteristics
2. Add the authors
3. Save the submission.

METADATA STEP

Fill in at least all mandatory information marked with a *. Enter the title, abstract, keywords, and choose the type of submission as well as the theme(s) in the proposed list.

Once you have filled in all the information, click on the "Next Step" button at the bottom of the page. This allows you to proceed to the step "Author(s)".

AUTHOR(S) STEP

This step allows you to add the authors of your submission.

By default, as a depositor, you appear in the list of authors of the repository.

You can fill as many co-authors as you want by clicking on "Add an author (+)".

In the window that appears, the first field allows you to search for authors already present in the HAL repository, then in the Sciencesconf authors database. Prefer the search for an author already present in our databases by entering their first name and last name in the first input field and select the author if they appear in the list.

If the author is not listed, you can create it. Fill in at least the mandatory fields identified by an asterisk, then click on OK.

Once you have filled in all the information, click on the "Next Step" button at the bottom of the page. This allows you to proceed to the "File(s)" or "Summary" step.

OVERVIEW STEP

Finally, in the "Overview" step, you can view your submission. Check all the information entered. If you want to return to your repository, click the previous steps at the top of the screen; otherwise, click on the "Submit" button.

A pop-up window informs you that your submission has been registered.
